AN SPX BRAND

Parts & Service

Improve your performance

SPX[®]

Global services for individual needs

In addition to offering global service and spare parts support for equipment purchased from SPX, we also play a proactive role together with many customers in order to help them achieve consistently high performance throughout the service life of their SPX equipment.

Equipment:

- Anhydro Evaporators
- Anhydro Dryers
- Anhydro Spin Flash Dryers
- Anhydro Fluid Bed Dryers

Spare parts and service support

SPX maintains an extensive stock of spare parts for plant and equipment up to 10 years old. Parts for older plants and equipment can be ordered subject to an extended delivery time. Customers with plant and equipment which is more than 10 years old are therefore recommended to consider an upgrade in order to avoid unscheduled downtime.

Replacement of parts:

- Original Anhydro spare parts
- Repair of key backup components
- Reconditioning of equipment and components

Technical service:

- On-site technical service support
- Hotline service
- On-site equipment process check and optimization
- Training in preventive maintenance and process optimization
- Preventive or corrective Service Agreements

New features:

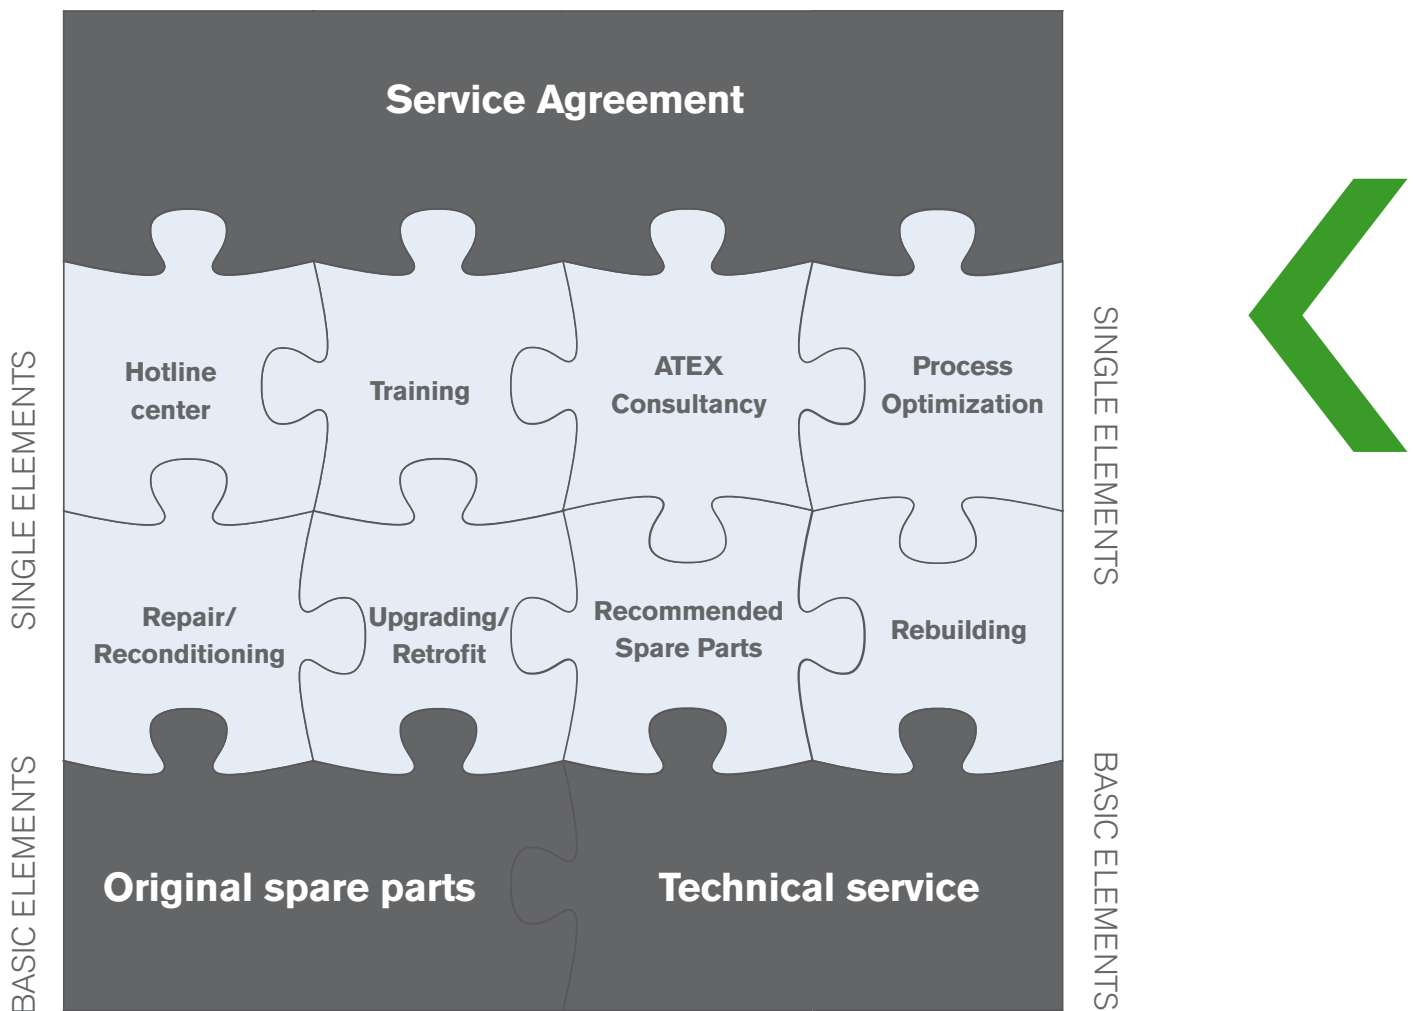

- Upgrading of equipment with new features, resulting in higher capacity, energy savings and improved availability

Anhydro Service Agreements

Anhydro Service Agreements consist of basic and single elements. By combining selected single elements on top of the basic elements, you can customize your own, special Service Agreement to ensure you the exact type and level of support that best suits your individual needs. For more information, please contact your local SPX representative.

SPX Flow Technology provides a full range of Anhydro Evaporation and Drying equipment for the global dairy, food and beverage, chemical, healthcare and pharmaceutical industries. Focusing on flexibility and attentiveness to individual customer needs, SPX enables excellence at every point along the value chain as part of our commitment to our customers' success.

SPX acts as a strategic development partner for leading manufacturers all over the world. Through close collaboration with our customers, we promote the development of innovative concepts and optimization of existing processes, enabling customers to introduce new products into the market as quickly and as cost effectively as possible.
